Ontario, Canada · Full Stack | Front-End | Back-End Developer · Open to Full-Time & Contract Opportunities

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 6+ years of experience architecting and delivering scalable web applications across enterprise, e-commerce, and CMS platforms. Proficient in **Angular, React, Node.js, Express.js, WordPress, and the MERN stack**. Strong track record of improving application performance, building responsive UI/UX, and integrating RESTful APIs in agile environments. Actively leverages **AI-assisted development tools** — including GitHub Copilot, Claude, and ChatGPT — to accelerate code delivery, improve quality, and reduce debugging time. Recently completed an Ontario College Graduate Certificate in Web Application Development (MERN Stack) at Lambton College. Eligible to work in Canada. Seeking senior or intermediate developer roles in the Canadian IT market.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular 8+, React.js, Bootstrap, Responsive Design, Accessibility (WCAG), UI/UX Principles

Back-End: Node.js, Express.js, Hapi.js, Nest.js, RESTful API Design & Integration, MEAN Stack, MERN Stack, Microservices Architecture

Databases: MySQL, MongoDB, NoSQL, Database Schema Design, Query Optimization, Data Modeling, Aggregation Pipelines

CMS & Platforms: WordPress (Custom Themes, Plugins, Gutenberg), Adobe Experience Manager (AEM), Headless CMS Concepts

AI-Augmented Dev: GitHub Copilot, Claude AI, ChatGPT (code generation, debugging, refactoring), Cursor IDE, Prompt Engineering for development workflows, AI API integration

DevOps & Cloud: Docker, GitHub Actions, CI/CD Pipelines, AWS (deployment), Git, Version Control, Container Orchestration

Testing & QA: Unit Testing (Karma), E2E Testing (Protractor), Splunk Web App, Manual & Automated Debugging, Code Review

Languages: JavaScript, TypeScript, Python, Java, C++, C#, Kotlin

Tools & Workflow: NPM, Yarn, Composer, Postman, VS Code, Jira, Agile/Scrum, GitHub

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Bluewave Labs (Checkmate.so) · Remote, Canada | January 2026 – April 2026

- Contributing to the development of Checkmate, an open-source infrastructure monitoring platform tracking uptime, servers, Docker containers, and hardware health.
- Rebuilt and optimized React front-end components for status and uptime dashboard pages, improving data clarity and user interaction.
- Leveraged GitHub Copilot and AI-assisted tooling to accelerate feature development and reduce code review cycles.
- Collaborated asynchronously with an international open-source team, maintaining clean commit history and PR documentation.

WordPress Developer (Contract)

MomentSeekerzStudio · Kingston, Ontario, Canada | January 2024 – June 2024

- Developed and optimized WordPress websites, reducing page load times by 25% through code refactoring, lazy loading, and caching strategies.
- Built custom themes and plugins from scratch to match client brand requirements and extend core WordPress functionality.
- Designed and delivered 5 fully responsive landing pages using custom CSS3, JavaScript, and Gutenberg block configurations.
- Managed client communication, scope definition, and iterative delivery in a freelance capacity, meeting all milestones on schedule.

Note: January 2023 – December 2023 — Relocation to Canada / Career transition period following departure from Infosys.

Technology Analyst / Full Stack Web Developer

Infosys Limited · Trivandrum, India | September 2019 – January 2023

Client: Metro by T-Mobile — metrobytmobile.com (US Telecom Enterprise)

- Acted as primary technical point of contact for risk control and incident resolution on Metro by T-Mobile's production and non-production web platforms, managing 15+ critical incidents per month with a 95% resolution success rate.
- Architected and maintained Angular front-end components delivering accessible, responsive interfaces used by 2+ million monthly visitors on metrobytmobile.com.
- Built and maintained Metro's e-commerce platform with secure payment processing, dynamic product catalog displays, and cart functionality for 1,000+ daily active users.
- Designed and consumed RESTful APIs across the MEAN stack, reducing data latency and improving application throughput.
- Implemented real-time monitoring and troubleshooting workflows using Splunk and Grand Central Web App, improving issue detection speed by 25%.
- Delivered technical enhancements to Metro's PDL analytics platform, boosting system efficiency and supporting 2nd and 3rd level escalation support.
- Developed TalentCapture, an internal MEAN stack HR tool for fresh-recruit data management; led the full project lifecycle from requirements to production deployment.
- Authored technical documentation, runbooks, and stakeholder reports for all development stages and production changes.

TECHNICAL PROJECTS

Checkmate — Open-Source Infrastructure Monitor

React, Node.js, Express.js, MongoDB | January 2026 – April 2026 | [akashmannil.dev](#)

- Active contributor building real-time uptime dashboards, server health views, Docker monitoring, and team communication features.
- Applying AI-assisted development practices (Copilot, Claude) to improve velocity and maintain code quality across async PR contributions.

TalentCapture — Internal HR Recruitment Tool

Angular, Node.js, Express.js, MongoDB | December 2019 – February 2020

- Built full-stack MEAN application for Infosys HR to manage, query, and report on fresh-recruit data across business units.
- Led end-to-end lifecycle: requirements, architecture, development, testing, and deployment. Maintained W3C standards and ensured cross-browser compatibility.

EDUCATION

Ontario College Graduate Certificate — Web Application Development

Lambton College · Sarnia, Ontario, Canada | Completed April 2026

Specialization: MERN Stack & Native JavaScript · GPA: **3.87 / 4.0**

Bachelor of Technology — Electrical & Electronics Engineering

Kerala Technological University · India | August 2015 – May 2019

Overall Grade: **80%**
